
Data Collection System (DCS) 3000

User Guide

Chapter 3

Software Version Numbers: Client V 4.8y1

Using the DCS Client

The DCS Client application was developed to enable Law Enforcement Agencies (LEAs) to collect data for Court-approved surveillance operations. [REDACTED]

b2
b7E

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 05-22-2007 BY 65179 DMH/TAM/KSR/cb

The settings and functions of the Client are presented in the following sections:

- Working in the Client Window
- Setting up a Collection
- Setting up a Specialized Collection
- Establishing a Connection
- Modifying and Removing Warrants
- Monitoring and Recording Calls
- Storing and Printing Target Data Files
- Suspending Target Surveillance
- Shutting Down the Client
- Client Hotkeys
- Quick Steps

Working in the Client Window

This section covers steps for working in the Client window. These functions are found under the Edit, Search and View menus in the Client's main window:

- Changing the Display
- Clearing the Screen
- Using the Find Feature
- Selecting and Copying Data

Changing the Display

Setting up a Specialized Connection

At times, it is necessary for the Client to interface with outside applications to track targets on specialized networks or to utilize specialized tracking features. [REDACTED]

b2
b7E

The screenshot shows a dialog box titled "Specialized Connection". At the top, there is a checkbox labeled "Consider Information" which is checked. Below this, there are two input fields: "IP Address" and "Port Number". To the right of these fields are two buttons: "OK" and "Cancel". Below the input fields, there is a table with three columns: "CASE ID", "MAC ADDRESS", and "ROUTE TO IP ADDRESS". The table is currently empty. At the bottom of the dialog box, there is a large rectangular area for additional information or notes.

The screenshot shows a configuration window with a title bar containing a small icon and a label. Below the title bar is a large text area. The main content area contains two labeled input fields: "TCP/IP Address" and "Listen Port Number". To the right of these fields are "OK" and "Cancel" buttons. At the bottom left is a checkbox labeled "Enabled". At the bottom right, there is a text block that reads "Information Provided by TICTU Engineering Personnel".

Figure 3-7  Window

b2
b7E

Establishing a Collection

The following steps are covered in this section, which allow the Server to receive the appropriate information regarding the target and enable surveillance to begin:

- Send Target to the Server
- Connecting to the Server
- Connecting to the Switch
- Request Target List

Send Target to the Server

b2
b7E

The following steps are required for the Client to manually forward or send target(s) to the Server:

To send a target to the Server:

b2
b7E

TRIGGER NUMBER	DATE ID	TARGET NAME

A screenshot of a software window titled "DCS Current Summary File Report". The window has a standard Windows-style interface with a title bar, menu bar, and toolbar. The main area is divided into two sections. The top section contains several input fields: a large text box, a smaller text box, and a date field labeled "Start Date (mm/dd/yyyy)". To the right of the date field is a "Clear Dates" button. Below the date field is another date field labeled "Stop Date (mm/dd/yyyy)" and a "Generate Report" button. The bottom section is a large, empty rectangular area, likely for displaying the report data. The window has a "Close" button in the bottom right corner.
